## TRAVEL

### High ARCTIC in mid-summer with abundant UNIQUE WILDLIFE

A place of snow-capped mountains, glaciers, fjords and abundant wildlife

**POLAR BEARS** and **WHALES**: you can watch and photograph wildlife close-up in the bow or from high on the bridge. See **Walrus, Bearded** and **Ringed Seals, Arctic fox** and **Reindeer**; see them all close up from the zodiacs. **Puffins, king eider, phalaropes** and **auks**: marvel at the teeming seabird colonies. **Kayak** amongst the **ice floes** and **fjords**. See incredible colour of the flowering **Tundra. Walk** with guides, all naturalists and photographers, leaders and guides

*All photos taken by Amelia Dalton during the 2017 Arctic expedition*

Swimming polar bear

## Observation Lounge

From our ice-class, purpose-built ship, the **National Graphic Explorer**, we cruise the remote fjords and corners of the strikingly beautiful **SVALBARD ARCHIPELAGO**. Without needing to adhere to a designated itinerary our voyage will take advantage of the ice and sea conditions seeking out the **unique wildlife** of this breathtaking mountainous group of islands. Lying well north of the **Arctic Circle**, the continuous daylight of mid-summer continuous opportunities to search the edge of the pack ice and glaciers. The crow's nest camera helps to spot **polar bears, walrus, seals, reindeer, whales** and **arctic fox**. Our viewing areas are varied, from the **bridge itself**, on the spacious open decks, in comfort in the **Observation Lounge**, or **right up in the bow**: these open spaces offer superb opportunities for exceptional viewing and for photographers. **Zodiacs** and **kayaks** take us **closer** to **Svalbard's** dramatic geological features and the wildlife that flourishes in mid-June. With our on-board **photographer** and experienced **naturalists**, we stretch our legs ashore to view historic sites and the tundra's **miniature gardens** watch teeming **puffins and auks, kayak** past sparkling **icebergs** to **explore** the **glaciers** and **fjords** which split the coastline. **Svalbard** is widely accepted as the most striking place to see **polar bears**, and boasts a growing population, plus of course we expect to see **killer** and **blue whales** and if we are lucky a **white beluga** or the unicorn of the sea – the **narwhal**.

A comment from a 2017 passenger: *"I really loved every minute and it exceeded my expectations. Needless to say, the wild life and scenery were superb, the ship extremely comfortable and the food very good."* Vicky, Wiltshire.

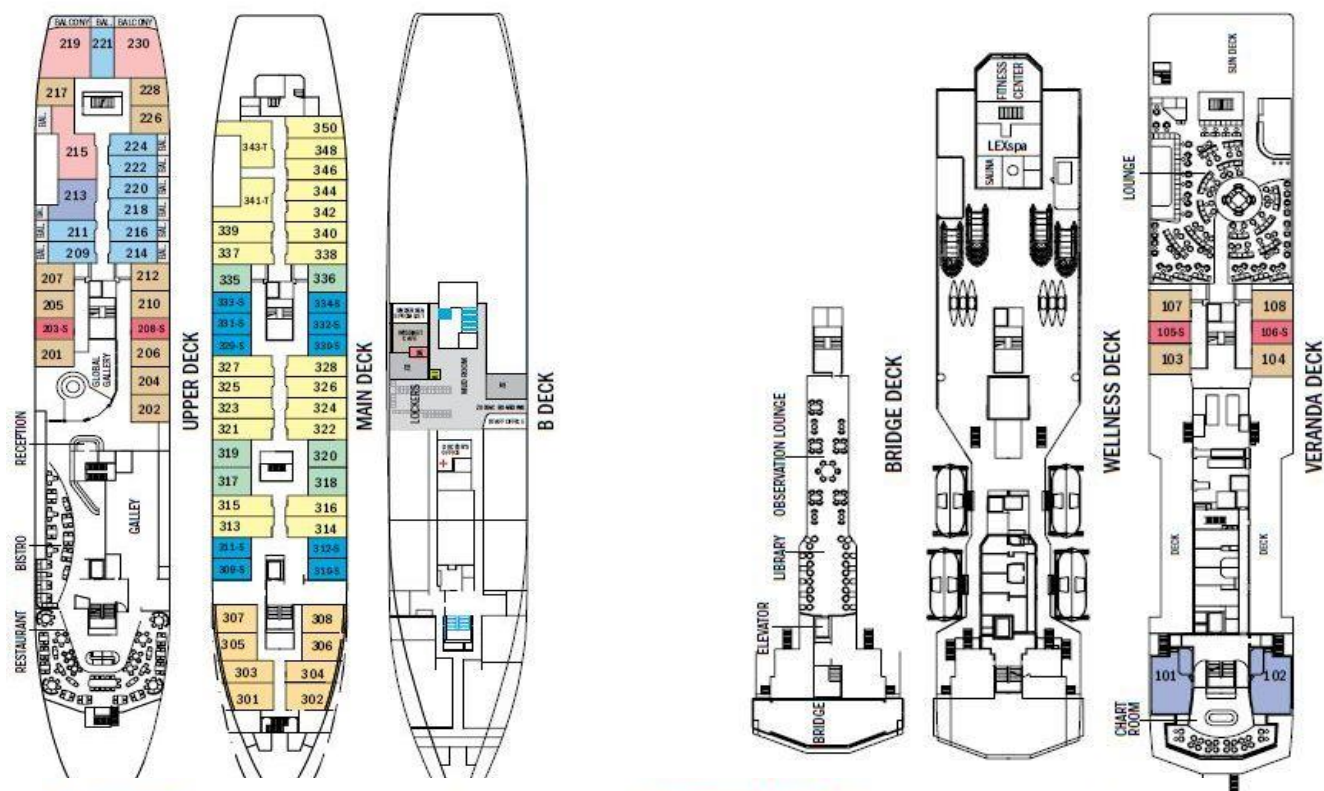

*Our ship, the **National Geographic Explorer** at anchor in 2017 whilst we walked ashore  
2018 embarkation 1<sup>st</sup> June and disembark 8th*

In 2017 we watched **15 polar bears**, including 2 mothers hunting with **cubs**, a seal stalk and kill, 4 kinds of **whales** including **Beluga** and **Blue**, **walrus**, **seals**, **Arctic fox**, **reindeer**, **King Eider duck** as well as **puffins**, **geese**, **phalarope** and rafts of seabirds.
